MOTOR CARS NECESSARY IN ALL WALKS OF LIFE

1920 Smashes All Records for Demands for Motor Vehicles; Greater Production Demanded for 1921.

All previous production, sales, export and registration marks were passed by the automobile industry in 1920 according to statistics contained in "Facts and Figures," 1921 edition, which is issued by the national automobile chamber of commerce.

General prosperity and the increasing use of cars and trucks as economic transport units on farm and in industry are believed to be the leading factors in the increased business of the industry during the past year.

"The motor car has become an indispensable instrument in our political, social and industrial life," said President Harding in his first message to Congress on April 12. This statement, which appears on the cover of the annual review of the industry, is the keynote of the 1921 edition, supported by many pages of research on the use of the car in many avenues of business. Three million motor vehicles are used by farmers, 100,000 by doctors, 30,000 are used by state governments, 10,000 by municipalities, 12,000 by rural schools, 4,000 by packing houses, several

thousand by the post office department and thousands more by telephone companies, salesmen, bus lines and other commercial and professional activities.

3 1/2 Billion Dollar Sales.

The total wholesale business of motor vehicles, parts, tire and accessories in 1920 amounted to \$3,594,814,620. This included car and truck sales of \$2,232,927,678 parts and accessories of over 725,000,000 and tire replacement business of \$636,750,000.

Closed Body Output on Increase.

Closed bodies formed 17 per cent of the passenger car production of the current year as compared with their 10 per cent place in the 1919 output. The total number of vehicles produced in 1920 was 2,205,197, of which 322,039 were motor trucks and 1,883,158 were passenger cars, a gain of 12 per cent in 1919 of total motor vehicle output.

Registration Gains 22 per cent.

Automobile registration in the United States for 1920 totaled 9,211,295 or 22 per cent more than in 1919. Approximately 900 of these vehicles were motor trucks. South Dakota now has one automobile for every five and a half, and Nebraska one for every 5.9. New York leads the list

on the basis of gross registrations, totaling 670,290 (calendar year figures). West Virginia showed the greatest percentage growth by adding 61 per cent to her 1919 record.

Ohio was the banner state from the standpoint of numerical increase, adding 110,359 cars and trucks.

Exports formed a larger part of
